- SharePoint Customization & Development
- Custom Business Process & Collaboration Solutions
- Office 365 & SharePoint Managed Services
- Microsoft Azure Advisory, Development, & Management

Migrate Your Business to Office 365 – The Right Way

More than just Office in the cloud, Office 365 offers a suite of best-in-class SaaS productivity services. Our experts ensure a seamless transition and guide you through the productivity solutions available.

- Establish an adoption roadmap employees can handle.
- Plan security for company data, even on employee owned devices.
- Identify problem areas early so they don't slow things down later.
- Configure Office 365 services according to best-practices and needs.
- Synchronize local user accounts with cloud identities.
- Email mailbox migration to Exchange Online.
- Purchase the right licenses for your users.
- Move Windows-style file shares to SharePoint Online.
- Keep employees informed of changes and provide end-user training.

Proudly providing solutions utilizing these platforms:

Organize Everything – Engage Everyone – Embrace Mobility

Modernize your business, giving employees more tools, and reduce the amount of time spent maintaining and managing your own servers and equipment.

Break the desktop chains – achieve business productivity on tablets and mobile devices for iOS, Android, and Windows.

Our expert consultants create amazing business solutions for team, department, and company needs.

Gain peace-of-mind that your environment follows industry standards and best-practices.

Your Office 365 and Microsoft Azure experts!

Are you upgrading to SharePoint Server 2016 – we can help!

SharePoint Solution Development

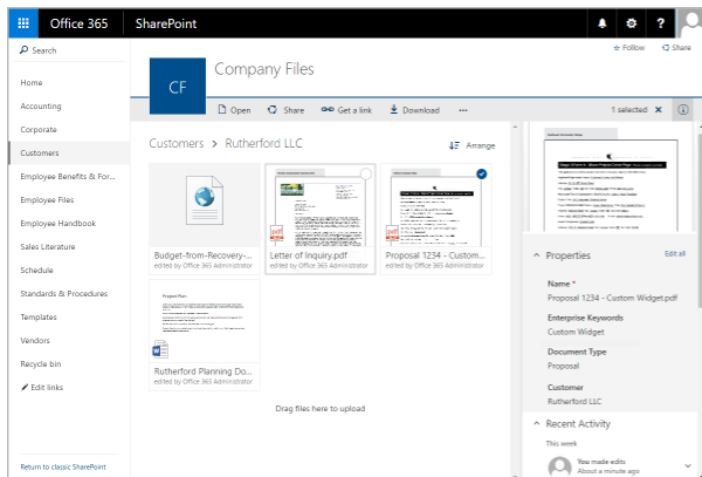

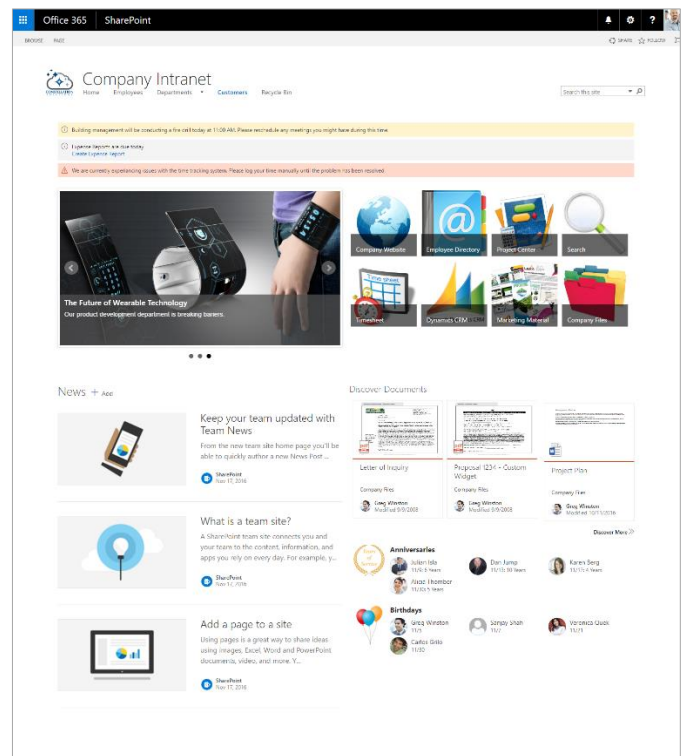

SharePoint is a powerful platform for business, but not everything is included out of the box. We deliver expertly crafted solutions to enhance business processes and team collaboration.

Intranets and Business Portals

- Guide employees to useful information.
- Keep informed about the current activities and work happening within the organization.
- Consolidate information for a specific topic, process, or community.

Team Collaboration

- Organize documents, notes, web pages, news, contacts, forms, and tasks.
- Convert that outdated Windows file share into a mobile-ready, web-based, document sharing content hub.

Manage Files and Content

- Save and access files in the cloud from anywhere and sync them across your devices.
- Collaboration on documents, spreadsheets and presentations, and view file activity in real-time.
- Discover trending content from the areas you care about.

Go Mobile

- Securely access company email and documents from any location or any device.
- Experience true business productivity on mobile and tablet devices and finally get work done outside of the office.

Managed Services

Outsource your ongoing customization and administrative needs and provide a high-level of service to your organization. We have managed services plans covering Office 365 and SharePoint (On-prem/Online). Gain piece-of-mind or free up your IT staff.

Cloud management at its best! We'll manage and customize your cloud identities, Exchange mailboxes, SharePoint sites, OneDrive for Business, Yammer network, and subscriptions.
